SMOKETOWN, PENNA.

Dear Customers and Friends

March 15, 1962

We wish to thank you very much for your continued patronage. It is our pleasure to be of service to you, the American Farmer. We realize that Agriculture plays an important part in our economy today as in days gone by.

We are proud to introduce to you new and better varieties from time to time. In this folder we are trying to emphasize some of these new varieties. Many times a few pennies spent for an improved variety means a return of many extra dollars from your farm crops.

May we call your attention to several collections of vegetable and flower seeds on the back of this folder. Here we are featuring some of our most outstanding varieties. Our purpose is to acquaint more of our farm seed customers with these outstanding strains that produce finer and better tasting vegetables.

Prices on DeKalb Corn are found at the bottom of this page. On page 3 you will find a general price list of the other seeds and an order blank for your convenience.

We pay the freight on 200 pounds or more, except on Potatoes. Your orders will have our careful and prompt attention.

Sincerely yours,
P. L. ROHRER & BRO., INC.

TOP QUALITY CERTIFIED SEED OATS

HI - PURITY — HI - GERMINATION — GOOD BUSHEL WEIGHT

There is no substitute for Quality

Certified GARRY OATS

Garry Oats is one of the most highly recommended varieties for Pennsylvania and New York. It combines in one variety the following desirable features:

- High yielding ability.
- Good straw strength, about 4 to 5 inches taller than Clinton.
- Resistance to stem and crown rust.
- Resistance to Helminthosporium (blight).
- Plump, creamy white kernels.
- Maturity midseason.
- Garry is noted for its strong tillering or stooling ability, thereby producing strong stands of remarkable vigor.
- Sow $2\frac{1}{2}$ bushels per acre.

Certified CLINTLAND OATS

Clintland is a medium early maturing variety and is similar to Clinton in appearance and breeding. It is fairly high in yield and carries good bushel weight. The grain is yellow and straw is medium short, with good standing ability. The main advantage of Clintland over Clinton is its resistance to the most prevalent races of leaf rust. Clintland is a good variety for combining.

Sow $2\frac{1}{2}$ bushels per acre.

Certified ONEIDA OATS

This is one of the newer varieties released by Cornell University. Oneida is very similar to Garry except that it is more resistant to black stem disease which has appeared in the northern part of Pennsylvania and New York. It also ripens more evenly than Garry.

Sow $2\frac{1}{2}$ bushels per acre.

Certified CLINTON OATS

Clinton has proved to be a very good combining Oats. It is a stiff-straw variety of medium to short straw length. The grain is yellow and usually has good bushel weight.

Sow $2\frac{1}{2}$ bushels per acre.

Certified AJAX OATS

Ajax is widely adapted to various types of soil. It seems to show up better on poorer or lighter soils than most varieties. Ajax is about the same maturity as Garry and similar in straw length. It can be used in mixtures with Spring Barley when a mixture of Oats and Barley is wanted.

Sow $2\frac{1}{2}$ bushels per acre.

DEKALB Hybrid Corn

DEKALB**

RUSSELL OATS

NEW! RUSSELL OATS

The greatest Oats variety to come to the Northeast since 1955, surpassing Garry and Rodney.

Russell has all the qualities Garry has, but in addition, it is it in appearance both in the field and in the bin.

- A wonderful deep green color
- Extremely even in ripening
- Heavy, creamy white kernels
- Tremendous yields of grain

Russell will appeal to all farmers because it is a better variety for their use, producing more grain, on stronger shorter straw, more even ripening, with profuse tillering ability.

We urge all farmers to sow Russell Oats to improve their yields and minimize their harvest problems.

Order early, as supply is limited this year. Sow 2 bushels per acre.

ERIE SPRING BARLEY

One of the highest-yielding spring varieties. Erie is a smooth-bearded, 2-rowed variety of medium maturity, producing large heavy kernels on fairly stiff, medium-height straw. This has been a very satisfactory variety. Sow 2 bushels per acre. See Price List.

CANADA FIELD PEAS

Used both as a green feed and as a fertilizer. The amount of feed produced per acre is very large. When sown with oats, Canada Field Peas produces ideal ensilage. The oats helps to support the peas, thus making harvesting easier. Sow $1\frac{1}{4}$ bushels Peas per acre with $1\frac{1}{2}$ bushels oats. It will pay you to inoculate your Peas with Legume-Aid. See Price List.

SUDAX SX11

**THE "MIRACLE" GRAZING
AND GREEN CHOP**

A Product of DEKALB RESEARCH

This amazing new forage crop is a cross between Sudan Grass and Sorghum. It produces a leafy, high-tonnage crop high in feeding value. In tests it has yielded up to 40% more tonnage than Piper Sudan. It revives quickly after cutting or grazing. The ideal forage crop for pasture or silage; also makes good "cut green and fed" feed. Sow 35 to 40 pounds per acre.

25-lb. bag.....\$6.00
50-lb. bag.....11.00

ORTHO

**Bird Repellent and Seed Protectant
DOES THREE JOBS**

This product has been specifically formulated to protect seed and seedlings against crows, blackbirds, pheasants, and certain other grain-pulling birds. It also protects against wireworms, seed corn maggot. In addition it contains a fungicide to prevent damping-off and seed decay. Use on corn, wheat, oats, barley, rye.

Economical to use. Just mix powder with seed at planting time, preferably the night before seeding.

Postpaid
1-bu. size.....\$1.19
6 1-bu. sizes.....6.25

HARVESTING ALFALFA

Certified RANGER ALFALFA

Ranger is a long-lived Alfalfa which is highly resistant to bacterial wilt. Ranger has proved to be successful over a number of years. It is a good yielder and is very winter-hardy. Can be used where stands are wanted for more than three years. Sow 20 pounds per acre.

Certified BUFFALO ALFALFA

Buffalo is another wilt-resistant variety. It yields about the same as Ranger but is not quite so winter-hardy. It is recommended for southeastern Pennsylvania and south. Sow 20 pounds per acre.

PENNSCOTT RED CLOVER

This is one of the newest varieties of Red Clover on the market. It originated in Pennsylvania and is one of the highest producers. It is outstanding in seedling vigor and early spring growth. Consistently superior stands the year following seeding. Sow 10 to 12 pounds per acre. (Supply limited; order early.) See Price List.

SPECIAL HAY MIXTURE

This is a good economical mixture that can be used for hay or pasture. It contains approximately 45% Red Clover, 25% Alfalfa, 25% Timothy and 5% Ladino Clover. Sow 12 to 15 pounds per acre. A very good buy. See Price List.

BIRDSFOOT TREFOIL

Birdsfoot is a very hardy, deep-rooted perennial legume somewhat like alfalfa, but much finer stemmed. The plant remains green and continues to produce new growth even when the seed pods are ripe, making seed harvesting very difficult but enhancing the value of the plant for feeding purposes. It is one of the few legumes that will not cause bloat in sheep or cattle.

EUROPEAN or IMPORTED. In general, the plant is erect in growth habit, with earlier recovery after harvest and faster growth in the spring. Imported Trefoil has given a very satisfactory performance throughout the Northeast, and its usage is rapidly increasing. Sow 6 to 8 pounds per acre with 6 pounds Climax Timothy.

VIKING BIRDSFOOT TREFOIL. One of the newer improved varieties. High yielder with good winter hardiness. Sow 6 to 8 pounds with 6 pounds Climax Timothy.

MANSFIELD BIRDSFOOT TREFOIL. Similar to Viking, but usually lower in price. Sow same amount as Viking.

SOY BEANS

WILSON. This early sort will mature seed in Pennsylvania, Ohio, and New Jersey. On account of the abundant growth of slender stems and branches, Wilson makes the best sort to grow for hay. Sow 2 bushels per acre.

WABASH. One of the best yellow Beans. Combines high yield and high oil content, good standing ability, desirable height, and good quality seed. A good variety to grow for Beans. Will not produce as much hay as Wilson, but stands up better. This is a good variety to sow with sorghum and corn for ensilage.

OGDEN. This is a mammoth type which is planted mainly for ensilage. It is excellent for this purpose because it grows very tall and leafy and has coarser, stiffer stems. It can be sown in mixtures with cane or other sorghums or it can be drilled in with corn to be used for ensilage. When sowing in corn, sow 10 pounds per acre; with sorghums, sow 1½ bushels Beans per acre with 20 pounds of sorghum and a peck of corn. Sow this mixture with a drill.

ALFALFA

for more Profitable HAY CROPS

Ranks High in Feeding Value

PRE-INOCULATED SEED
NOW AVAILABLE

Certified DU PUIT'S ALFALFA PRE-INOCULATED

In looks and performance Du Puits is one of the most outstanding Alfalfas of the day. It has large, almost round leaves; grows big and tall; blooms about a week earlier and grows later into the fall. It rates high in winter hardiness. Du Puits has exceptional vigor and recovers quickly after cutting. It is widely adapted to growing conditions in many states.

Du Puits is not a wilt-resistant variety. We recommend it only where stands are wanted for three crop years or less. If stands are wanted for more than three crop years, we highly recommend Vernal or Ranger. Sow 20 pounds per acre.

Certified VERNAL ALFALFA Wilt Resistant

Certified Vernal has just about all the good qualities that one could wish for in a variety of Alfalfa: **winter hardiness—wilt resistance—high yield—excellent quality—fineness of stem.**

Vernal produces heavy growth and has the capacity to stay green when other varieties yellow under adverse conditions of long dry weather periods, disease or soil deficiency. Because of the longer green period of Vernal, the hay yield and quality is increased considerably.

If stands are wanted for three years or more, we highly recommend Vernal. Be sure to try this long-lived variety. Sow 20 pounds per acre.

New "ALFA" Variety ALFALFA

Scandia Brand

Scandia Brand Alfalfa represents a new breakthrough in Alfalfa breeding. In hay yielding ability, this variety is among the top performers. Its high yield is partly due to its *rapid growth and fast recovery* after cutting. It has bred-in high seedling vigor along with good resistance to some of the leaf diseases. The hay quality is good and rates well for feeding. You will want to try this outstanding new variety. The seed we are offering is Certified and Pre-Inoculated. Sow 20 pounds per acre.

GRASSES AND PERMANENT PASTURE MIXTURES

BROME GRASS

Smooth Brome Grass is excellent for both hay and pasture. It is one of our most productive, nutritious and palatable grasses. It is an ideal companion grass for alfalfa and red or ladino clover. For best results Brome Grass is usually seeded 6 to 8 pounds per acre with a legume.

LINCOLN (Southern Type). Very popular variety, high yielding and persistent. Does not produce as much aftermath as Saratoga.

SARATOGA (Southern Type). Especially adapted as a companion grass with our new recommended vigorous alfalfa varieties. Because of its vigor and high yield, Saratoga increases the grass content of the mixture, especially in the aftermath. Sow 6 to 8 pounds per acre with a legume.

ORCHARD GRASS

PENNLATE. NEW. Late heading, leafy, vigorous, persistent variety recently released by the Pennsylvania Agricultural Experiment Station. Produces higher yields than S-37 or other late-heading varieties. Seed supply limited.

S-37. This is leafier and has fewer heads and finer stems than early Common varieties. Not so winter-hardy as Pennlate. Sow 4 pounds per acre with a legume or 15 pounds alone.

CLIMAX TIMOTHY

Heads about a week later and is leafier than common Timothy.

REED'S CANARY GRASS

Long life, long grazing season and large yields of nutritious, palatable forage make it a valuable pasture plant. Sow 12 to 15 pounds per acre for pasture. See Price List.

HIGHLAND PASTURE MIXTURE is suitable to well-drained upland. It contains Timothy, Meadow Fescue, Creeping Red Fescue, Red Clover, Red-Top, Kentucky Blue Grass and Ladino Clover. Sow 20 pounds per acre. See Price List.

LOWLAND PASTURE MIXTURE is somewhat similar to the above mixture, but it contains more of the grasses suitable to wet lands. Sow 20 pounds per acre. See Price List.

Volkman's BRAND

SUDANGRASS— SORGHUM HYBRID

Farmers from coast to coast confirmed the spectacular yield superiority reported in field trial reports for Volkman brand Sudangrass-Sorghum Hybrid, a sudan-type plant from sorghum-type seed.

The plant is a cross between sudangrass and grain sorghum that results in an exceptionally vigorous, tall sudangrass type. Its maturity is between Piper and Greenleaf. Its palatability is rated as excellent.

Tests and production fields throughout the United States and in foreign countries confirm its quality and superiority when used as a green chop, ensilage, pasture, even hay!

- Superior early growth
- Tall, sweet, juicy stalks
- Broad succulent leaves
- Excellent palatability
- Recorded yields of over 40 gr. wt. tons per acre, irrigated
- Strong root system
- True hybrid vigor
- Wide soil range
- Fast recovery from grazing
- Exceptionally vigorous

50-lb. bag \$12.00

6 or more 50-lb. bags \$11.00 per bag

Freight Paid on 200 lbs. or more

Certified PIPER SUDAN

This variety is more productive than regular Sweet Sudan. It also has more resistance to leaf blight and produces less prussic acid. Piper is highly recommended. Sow 40 to 50 pounds per acre.

MILLETS

GOLDEN. Also known as German Millet. The best for hay or fodder. When cut in full bloom the quality is exceptionally good and all kinds of stock relish it. On good soil a yield as high as 5 tons per acre may be expected. Sow 35 pounds per acre.

DWARF ESSEX RAPE

A valuable forage plant. One acre will pasture more hogs, sheep, and cattle than four acres of clover or other grasses. As a healthful, fattening pasture food it has no equal. It is an annual, producing large leaves, and can be sown any time from early spring until September. Ready for pasture 6 to 8 weeks after sowing. Sow 6 to 8 pounds per acre, broadcast.

Announcement

WE HAVE BEEN APPOINTED DISTRIBUTORS FOR

ORTHO "UNIPEL" FERTILIZERS

are important to YOU for 2 major reasons

Reason No. 1 The nutrients in ORTHO UNIPEL Pelleted Fertilizers are chemically blended through a vastly complex system of reactors, mixers, granulators, screens, dryers, coolers, crushers and coating drums to insure the uniformity of each tiny pellet.

Every UNIPEL pellet contains exactly the same amount of nitrogen, phosphate and potash (or whatever the formulation announced by the label) as every other pellet.

It is not possible for mechanically mixed fertilizers to give you this important uniformity. Although the same amounts of nitrogen, phosphate and potash in the same ratio, may be used, the mechanical mixing will not produce a uniform product.

Only through the use of chemically blended plant foods can you be certain that each plant receives its exact quota of specified nutrients.

Reason No. 2 The unique Ortho manufacturing process gives you two different forms of nitrogen and phosphate—one form that is immediately available to plant roots for quick starting growth, and one form that becomes available more slowly, providing continuous sustenance throughout the growing season.

SIX TOP-NOTCH VARIETIES OF HYBRID SWEET CORN

GOLD RUSH. Yellow. 77 days. Tender, sweet and of fine quality and flavor. Ears $8\frac{1}{2}$ inches long, with 12 to 14 rows, slightly tapered, well filled to tip. **Postpaid, $\frac{1}{2}$ lb. 40c; 1 lb. 70c; 2 lbs. \$1.35; 5 lbs. \$3.25; 10 lbs. \$6.20; 25 lbs. \$14.75.**

TENDERMOST. Yellow. 83 days. Has the most tender hull of any variety, and in addition, a high sugar content and a smooth delightful flavor. Ears 9 inches long, with 14 to 16 rows. **Postpaid, pkt. 20c; $\frac{1}{2}$ lb. 45c; 1 lb. 80c; 2 lbs. \$1.55; 5 lbs. \$3.75; 10 lbs. \$7.20; 25 lbs. \$17.25.**

SILVER CROSS BANTAM. One of the finest white Hybrid Corns on the market that matures earlier than the Stowell's Evergreen. It is a white duplicate of Golden Cross Bantam. Ears $7\frac{1}{2}$ to 8 inches long. Sweet and excellent quality. 86 days. **Postpaid, $\frac{1}{2}$ lb. 50c; 1 lb. 85c; 2 lbs. \$1.65; 5 lbs. \$4.00; 10 lbs. \$7.70; 25 lbs. \$18.50.**

IOCHIEF. An outstanding new yellow hybrid. Good flavor and tenderness. Stalks 7 to $7\frac{1}{2}$ feet tall, with ears $8\frac{1}{2}$ to 9 inches long, cylindrical, filled to tips with 16 to 20 rows of very deep, narrow kernels. Good, uniform color. Holds prime quality in field, which makes it an ideal canning and freezing Corn. 89 days. **Postpaid, $\frac{1}{2}$ lb. 45c; 1 lb. 75c; 2 lbs. \$1.45; 5 lbs. \$3.50; 10 lbs. \$6.70; 25 lbs. \$16.00.**

NARROW GRAIN EVERGREEN HYBRID 14 X 13. Stalks strong and tall; ears large and well filled with 18 or 20 rows of narrow, deep kernels. 90 days. **Postpaid, $\frac{1}{2}$ lb. 45c; 1 lb. 80c; 2 lbs. \$1.55; 5 lbs. \$3.75; 10 lbs. \$7.20; 25 lbs. \$17.25.**

STOWELL'S EVERGREEN HYBRID. Highly valuable to market gardeners and canners. Ears very slightly tapered, uniform, 16 or 18 rows; kernels white, medium wide, deep; cob medium-sized. 96 days. **Postpaid, $\frac{1}{2}$ lb. 45c; 1 lb. 75c; 2 lbs. \$1.45; 5 lbs. \$3.50; 10 lbs. \$6.70; 25 lbs. \$16.00.**

BUSH LIMA BEAN, FORDHOOK NO. 242

FORDHOOK NO. 242. Seven days earlier than the regular Fordhook. Quality is excellent. In nation-wide tests Fordhook No. 242 has outyielded the regular Fordhooks at the rate of three to two. Its outstanding characteristic is its ability to set under adverse weather conditions, particularly high temperatures. **Postpaid, $\frac{1}{2}$ lb. 35c; 1 lb. 60c; 2 lbs. \$1.15; 5 lbs. \$2.75; 10 lbs. \$5.20; 25 lbs. \$12.25.**

BURPEE'S STRINGLESS GREEN-POD. The rich green pods are almost round, and meaty. Absolutely stringless even after fully matured. **Postpaid, $\frac{1}{2}$ lb. 35c; 1 lb. 55c; 2 lbs. \$1.05; 5 lbs. \$2.50; 10 lbs. \$4.70; 25 lbs. \$11.00.**

LONG TENDERGREEN. Pods are round, straight, dark green in color and 7 inches long. Proved to be an excellent long-podded Bean for market gardeners. **Postpaid, $\frac{1}{2}$ lb. 35c; 1 lb. 60c; 2 lbs. \$1.15; 5 lbs. \$2.75; 10 lbs. \$5.20.**

PENCIL-POD or BLACK WAX. Pods round, meaty, and stringless. A fine Bean for the home-garden and for home canning. **Postpaid, $\frac{1}{2}$ lb. 35c; 1 lb. 55c; 2 lbs. \$1.05; 5 lbs. \$2.50; 10 lbs. \$4.70; 25 lbs. \$11.00.**

BRITTLE WAX (Round-Pod Kidney). Probably the earliest Wax Bean. The pods are round, very tender, stringless, and of very best quality. Very productive. **Postpaid, $\frac{1}{2}$ lb. 40c; 1 lb. 65c; 2 lbs. \$1.25; 5 lbs. \$3.00; 10 lbs. \$5.70; 25 lbs. \$13.50.**

ROHRER'S "FANCY" LAWN GRASS SEED

A permanent mixture containing a careful blend of high quality grasses, including approximately 42% Kentucky Blue Grass, Creeping Red Fescue, Red-Top. Does not contain Rye Grass or any other coarse grasses. This mixture produces a velvety carpet-like lawn of fine blended grasses of rich green color.

Prepare a fine seed bed, apply lime and fertilize well before seeding. After lawn is seeded, just pat or roll with light lawn roller. One pound covers 250 square feet.

Lb. box \$1.10; 5-lb. box \$4.95; 25-lb. bag \$22.50; 50-lb. bag \$42.50, prepaid.

See Catalog for complete line of Garden and Flower Seeds.

Pennsylvania residents please include the 4% Sales Tax on all items on this page.

ROHRER'S "GOOD TURF" LAWN GRASS SEED

A good general-purpose lawn mixture at a reasonable price. Contains a blend of permanent and quick-growing grasses that produce a good sod of rich green color. Ideal where the lawn becomes tramped considerably, especially where children play. One pound covers 250 square feet.

Lb. box 85c; 5-lb. box \$3.95; 25-lb. bag \$17.50; 50-lb. bag \$34.50, prepaid.

ROHRER'S "SHADY" LAWN GRASS SEED

A blend of hardy grasses which grow freely in shaded areas. May be sown under trees. This mixture produces a rich green, velvety-like lawn. One pound covers 250 square feet.

Lb. 95c; 5 lbs. \$4.50; 25 lbs. \$21.25, prepaid.

ATHLETIC LAWN GRASS SEED

A fast-growing, deep-rooted lawn grass mixture, producing a heavy turf with good green color. Ideal for terraces, playgrounds, athletic fields, parking areas, etc. Will take hard usage. One pound covers 250 square feet.

Lb. 49c; 5 lbs. \$2.25; 25 lbs. \$9.75; 50 lbs. \$18.50, prepaid.

ROHRER'S EXTRA FANCY LAWN GRASS SEED

Contains 40% Merion Variety of Kentucky Blue Grass

NEW!

This is a superior mixture in that it contains Pennlawn Creeping Red Fescue and Merion Variety Kentucky Blue Grass. Merion retains its beautiful dark green color and cushion-like appearance through heat and drought periods during the hottest summers. The main reason for its superiority is its vigorous root system, which goes much deeper into the soil. Sow in early spring or early fall. One pound covers 350 square feet.

Lb. box \$1.65; 5-lb. box \$7.95; 25-lb. bag \$37.50; 50-lb. bag \$72.50, prepaid.
